FCC - MAIL ROOM

Attn: Comments on Docket 92-235

Dear Commissioner:

As a provider of Police services located in Cornelius, Oregon, our Agency would be adversely affected by the migration plan, as proposed in PR Docket 92-235 and feel it is unrealistic.

The proposed PR Docket 92-235 would require additional hilltop sites in order to assure adequate coverage because of safety issues for our public safety personnel. This is not only economically impossible with additional hilltops necessary, but would require a change out of all existing mobiles and portables.

Docket 92-235 appears to prohibit mobile relay operations in the 150-174 MHz band for the public safety services. This again reduces coverage, which will be costly and prohibit car-to-car communications over a large area. Again, this will be an officer safety issue.

There are other concerns about the technical aspect of how the radios will work, but we will leave these to more knowledgeable people to give their comments. We do agree with APCO's comments, which you have received, and encourage you to work with APCO and APCO 25 committee.

Thank You,

Charles F. Standley

Charles F. Standley
Chief of Police
